Experienced full stack developer (2-5 years)

Job description

We are looking for experienced full stack developers to join our expanding software consulting team. In this role, you will help develop and design technology solutions that are scalable, relevant, and critical to our company's success.

Improve efficiency and bring overall improvements in the development activities of the various teams. Help to improve the teams functioning on technical skills, 360 degree thinking, coding techniques, coding standards, in evaluating issues/challenges, perform together with the teams on root cause analysis, provide/implement solid solutions to resolve the problems efficiently and effectively. Support actively the various teams in working in close collaboration with our customers.

You will become part of a dynamic team working on the development, maintenance and support of business-critical ERP/WMS solutions of major European customers.

As a full stack developer your responsibilities will include:

- developing front end website architecture
- designing user interactions on web pages
- developing back-end website applications
- creating servers and databases for functionality
- ensuring cross-platform optimization for mobile phones
- ensuring responsiveness of applications
- working alongside graphic designers for web design features
- seeing through a project from conception to finished product
- designing and developing APIs
- meeting both technical and consumer needs
- staying abreast of developments in web applications and programming languages
- be actively involved in team motivation, process implementation, …
- be a technical expert acting as a consultant, focused on sharing and transferring knowledge
- work closely together with the management team and support in reaching the company objectives/goals and do not hesitate to offer advice on topics related to your expertise
- be involved in customer contact as an expert in development, guiding/supporting our various teams and the projects they are working on.

Profile of the ideal candidate

The ideal candidate would have:

- a degree in Computer Science or any other discipline with 2 to upto 5 years' experience in the IT field
