

Experienced System Engineer - DevOps & Cloud

Job description

We are looking for experienced, passionate and energetic System engineer who will do CI/CD (continuous integration and continuous deployment) build, test, automate and maintain the infrastructure. Additionally, troubleshoot issues by developing tools and automated solutions, who is passionate about technologies, constantly seeking to learn and improve skills. Good knowledge on cloud platform services and DevOps tools.

You will handle overall aspects of the configuration, operation and maintenance of Infanion servers and networks, provide technical support for both systems hardware and software and related infrastructure.

Profile of the ideal candidate

The ideal candidate would have:

- experience between 1 to 2 years in the devops and cloud services field
- certification such as AWS will be an added advantage
- good to have exposure to Linux, Docker & any cloud platform (AWS/Azure/GCP)
- experience with CI (continuous integration) /CD (continuous deployment) using Jenkins
- experience with Configuration Management Systems - ansible, chef, puppet, saltstack (any one tool)
- good knowledge in microservices, Sonarqube, Kubernetes/EKS (Elastic Kubernetes Service) and its ecosystem
- design and implementation of robust solutions, like monitoring (monitoring tools such as Nagios, Pageduty), metrics infrastructure, cloud infrastructure, etc...
- experience with Version Control systems - Git/Github/Gitlab (GitLab is add on)
- hands on experience on scripting languages (Bash/Python)
- good knowledge on Terraform
- setup, upgrade, maintain and support of DevOps Applications including managing backups & troubleshooting/debugging systems and applications
- understanding of Microservice based Architecture
- ability to maintain production servers
- implement best practices for software build, deployment, and maintenance
- strong in Unix/Linux operating systems skills
- strong in troubleshooting/administrate infrastructure, including firewalls, databases, malware protection software, and other processes
- up-to-date knowledge of hardware/software installations/security measures, trends and advancements
- must possess the ability to analyze situations and provide problem resolution
- attention to details
- no problem with working independently
- no 9 to 5 mentality and a go-getter attitude
- an excellent spoken and written knowledge of English
- able to work with strict deadlines
- focused on getting tasks done
- the ability to work in a fast-paced environment
