Junior OutSystems Developer

Job description

We are looking for a Junior OutSystems Developer with hands-on experience in **OutSystems Developer Cloud (ODC)** for building, enhancing and deploying low-code applications. Experience with OutSystems 11 is considered if the candidate is actively transitioning to ODC and demonstrates the ability to adapt to modern, cloud-based OutSystems development practices.

This role is ideal for professionals with early-career experience who are keen to take ownership of application components, continuously learn modern development practices, collaborate with business teams and stakeholders, and contribute meaningfully to scalable and secure enterprise solutions.

Key Responsibilities

- Develop, enhance and maintain applications using **OutSystems Developer Cloud (ODC)**
  - ➢ Design data models (**entities, aggregates)**, and implement business logic using Server/Client Actions
  - ➢ Build responsive and user-friendly UIs using **OutSystems UI patterns, blocks, and templates**
  - ➢ Integrate external systems using **REST APIs** (SOAP knowledge is an added advantage)
  - ➢ Implement **role-based security** and handle errors and exceptions
- Manage deployments using **ODC Portal** across different environments
- Use **Forge components** effectively and monitor applications via **ODC** (application monitoring, error logs, timer management, tenant configuration)
- Follow Agile/Scrum practices and collaborate with cross-functional teams

Required Skills (Must Have)

- Strong working knowledge of **OutSystems Developer Cloud (ODC)**
- Understanding of **ODC module types** (Reactive, Mobile, Library)
- Understanding of ODC Pipelines, deployments and environment management
- Basic knowledge of **security, authentication, and integrations (REST)**
- Working knowledge of **SQL** for advanced queries in OutSystems
- Hands-on experience with **JavaScript, HTML** and **CSS** for UI customization using OutSystems
- Awareness of differences between **OutSystems 11 and ODC** (preferred)
- Familiarity with **Architecture Dashboard AO (Application Objects)** concepts such as technical debt, architecture patterns, and code analysis (is a plus)

Experience and Education

- **1 to 2 years** of hands-on developing applications using the OutSystems platform
- Experience in **2–3 real-time projects** (beyond training)
- Bachelor's degree in Computer Science, IT, Engineering, or a related technical field
- Experience with OutSystems Developer Portal, version control and deployment management, production deployments, database management systems, and basic monitoring and debugging
- Familiarity with **ODC Studio is a plus**
- Familiarity with **Agile/Scrum** methodology

Soft Skills & Mindset

- Strong communication skills and team collaboration skills
- Good command of *English* — with the ability to understand requirements, participate in demos, and contribute effectively in meetings
- Self-driven and capable of working *independently* with minimal supervision
- Strong sense of ownership and accountability
- Quick learner with curiosity for low-code platforms
- Strong analytical and problem-solving skills
- Proactive in learning new OutSystems features and best practices
- Flexible mindset with no rigid 9-to-5 mentality, willing to support delivery needs when required

Certifications (Preferred)

- OutSystems Associate Reactive Developer (O11 or equivalent)
- OutSystems Mobile Developer Specialist (O11 or ODC) – is an added advantage
- Any other OutSystems certifications are a plus

The Ideal Candidate is

- Smart and hardworking
- Independent and work with minimal supervision
- Committed to meeting tasks and deadline with quality
- Initiative taking
- Self-motivated and proactive
- Quick learner with a positive attitude
- Result-oriented
- Sound decision-making ability
