We are looking to hire energetic trainee testers for our i-Swat testing team. Candidates with a passion for testing and aspiring to become a test engineer are invited to apply. As a trainee you will be trained by our experienced i-Swat test engineers and you will be actively involved in testing all aspects of web applications/ product/ system like function/component, system, performance, regression and service. You will also interact and work with our software development engineers responsible for developing our web applications/product/system.

Profile of the ideal candidate

The ideal candidate would have:

- 0 to 2 years of work experience in manual testing with knowledge of automation scripts in Selenium
- a bachelor or master degree in Computer Science or any other discipline with additional training on software testing
- knowledge of java will be an added advantage
- attention to details and passion for testing
- no 9 to 5 mentality
- ready to work in a startup environment
- decent communication skills
- able to work with strict deadlines and under pressure
- focused on getting things done

The ideal candidate would be:

- committed to tasks and deadlines
- hardworking
- initiative taking
- self motivated
- quick learner
- pro-active
- result-driven
- able to work in a team as well as an individual

The compensation package

We offer you:

- competitive pay package
- dynamic and challenging job in an open work environment
- fast-track training on the job with mentoring by experienced engineers
- opportunity to grow with the company
- exposure to work with international customers
- front seat ride in the roller coaster of cutting edge technologies
